

Yealink VP59 IP Video Phone

Yealink VP59 is more than an IP video phone. It's an all-in-one conferencing solution for Microsoft Teams. Useful for personal desks or open work spaces, VP59 integrates a powerful codec, HD camera, and microphone. Unlike many video phones that tether the camera directly to the deskphone, Yealink's camera can be extended up to 10ft by using a USB cable. VP59 uses Android OS for excellent scalability.
